

CASE STUDY 1

"I was pleasantly surprised to see the benefit of actively managing the use of equipment in a productive, cost effective manner."

Brian Altriche, Owner of Golden Falcon Spur

Energyrite uncovered R11 969,00 savings for Spur in two months.

Energyrite were approached by Golden Falcon Spur to investigate their energy consumption. After installing the monitoring device and equipment in December, Energyrite were able to gather accurate, real time data, which initiated a daily schedule and behavioural change to reduce their electricity expenditure from the first month - January 2017.

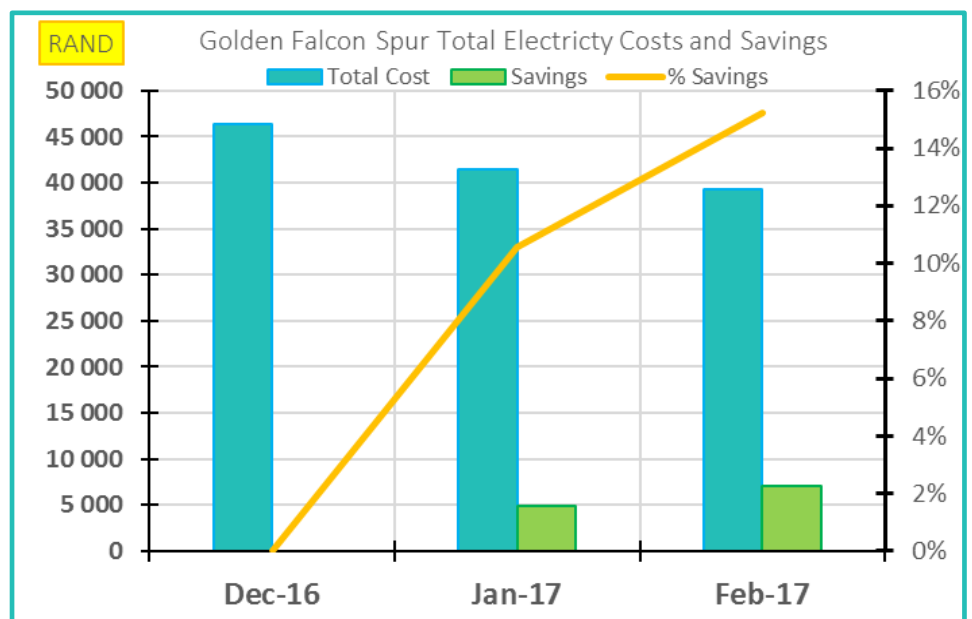

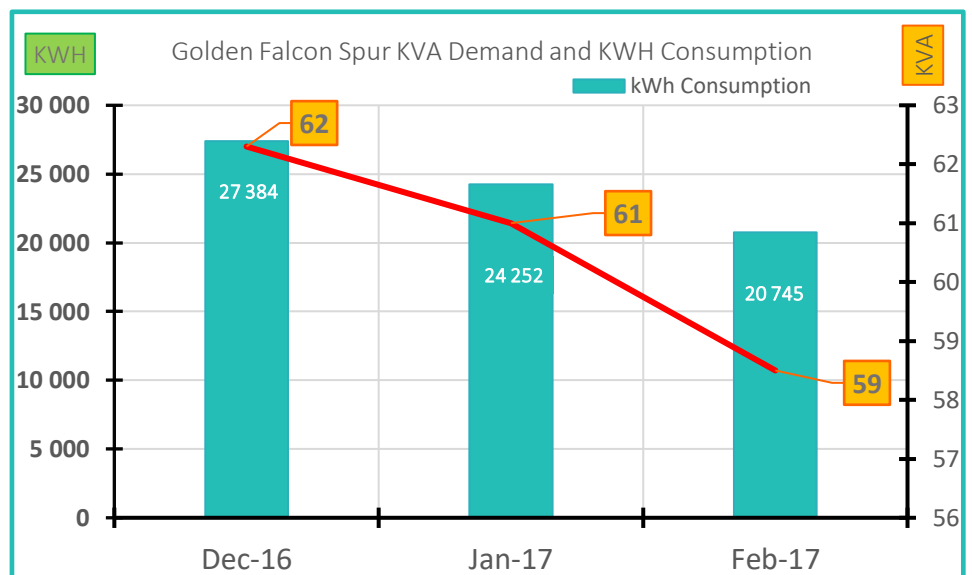

Customer: Golden Falcon Spur, Gold Reef City, Gauteng

Industry: Restaurant

Region: Gauteng, South Africa

Energy Saving Partner: Energyrite (Pty) Ltd

Project Summary: Installation of a real-time energy monitoring device, partnered with an in-depth data analytics software programme for Energyrite to monitor, identify and setup procedures to maximise savings for the Spur Store.

Month	December 2016	January 2017	February 2017
Total Cost	R46 401	R 41 498	R 39 335
Rand Savings	0.00	R 4 903	R 7 066
% Savings	0.00	10.57%	15.23%
